Hi Kayla,

Please add this email along with the updated O&M Plan to the 1BR-THI application folder.

Thank you,
Sergey

Hello Sergey,

Sorry for the delay. The as-built drawing has now been added to Appendix A in the O&M.

Regards,

Raquel Labranche, P. Eng.

Hello Sergey

I have modified the Annual reports to include the Waste and Soil information.

Regarding the comment for item 12 water usage, the washing step has never required any water usage. We have simply let the screened rocks be exposed to the rain on our treatment area. In the event that more water would be needed at this step, we would use our treated water to recirculate in the system and wash the rocks. Please let us know if this clears things up and if any modifications need to be made to the texts (Project summary and O&M) in order to better communicate this point.

The as-built drawing is being finalized and will be added to the O&M. I will be able to send it to you early next week.

Thank you!

Sounds good.

I will wait for the updated documents before distributing the file for public review then. This way we will have a more complete package.

Cheers,

Thank you for submitting the compliance table Raquel,

When should we expect the Items Scheduled to be delivered in September as per the table provided? Just a note that for the Annual reports you can just fill out the NWB's generic Annual Report form.

Thank you,

Objet : 1BR-THI1722 Amendment Application Inquiry

Hi Olivier,

I am the NWB Technical Advisor currently processing the Qikiqtaaluk Environmental's Amendment Application for Water Licence 1BR-THI1722. I just finished reviewing the files submitted with the application package and wanted to touch base and give you a few pointers.

In your original email dated July 16, 2019, you asked to *provide a licence specific direction* for the Compliance Assessment/ Status Report. You can just submit an Excel Spreadsheet outlining the status of compliance for all Licence conditions. Here is an example of such table:

Licence Condition		Status of Compliance	Short Term Plan for Compliance	Schedule for Implementation of Short Term Plan for Compliance	Long Term Plan for Compliance	Schedule for Implementation of Long Term Plan for Compliance
B - 1						
B-1.a						
B-1.b						
B-1.c						

Additionally, I noticed that the updated plans are still missing some information required by the Water Licence.

For example, the O&M Plan for the Soil Treatment Facility does not include ground water monitoring details, well locations, etc. (**Part G, Item 7** of the Licence). However, I noticed that this information is provided in the Environmental Protection Plan (section 3.1.5). So, you can either add a comment and reference it in the Compliance Assessment Report, or include the required information into the O&M Plan, or comment on when this will be addressed in the Schedule column.

Spill Contingency Plan does not address all the requirements of **Part H, Item 2** (i.e. spill on water, CIRNA contact info - yes, starting from this week they are CIRNA without "C", so you might address this as well).

Abandonment and Remediation Plan was supposed to include schedule of reclamation work as per **Part I, Item 1**.

Updated QA/QC Plan was supposed to be submitted within 3 months after the Licence issuance as per **Part J, Item 11**. However, I noticed that some information was incorporated into the EP Plan. So, maybe you can comment on that in the Compliance table.

Also, you indicated in the application that the 2017 and 2018 Annual Reports will be provided in August 2019 - make sure you address all the conditions required by the Licence, and in particular **Part B, Item 1g** - description of all progressive reclamation work undertaken, and **Part B, Item 1m** - discussion of the WTF best achievable treatment levels.

The 2017 Amendment of the Licence asked to implement measures to minimize erosion from discharge of effluent (**Part E, Item 4**). Please, address this as well.

Also, the CIRNA Inspector noted that the additional Soil Containment Area was constructed without following Part F of the Licence. I would like to remind you that the Construction Summary Report should be submitted within 90 days of construction completion as per **Part F, Item 5**. Again, there are As-build drawings in the O&M Plan. So, you can probably comment on that in the Compliance table as well.

Let me know if you have any questions.

You can reach me by phone at (867)360-6338 (extention 29) or by replying to this email.

Kind regards and looking forward to working with you,
