Good morning,

After discussing it with my colleague, this will be a modification and as per the licence:

1. The Licensee may, without written consent from the Board, carry out Modifications to the Project provided that such Modifications are consistent with the terms of this Licence and the following requirements are met:
 - a. the Licensee has notified the Board in writing of such proposed Modifications at least sixty (60) days prior to beginning the Modifications;
 - a. such Modifications do not place the Licensee in contravention of the Licence or the Act;
 - b. the Board has not, during the sixty (60) days following notification of the proposed Modifications, informed the Licensee that review of the proposal will require more than sixty (60) days; and
 - c. the Board has not rejected the proposed Modifications.
2. Modifications for which all of the conditions referred to in Part GE, Item 1 have not been met, can be carried out only with written approval from the Board.
3. The Licensee shall provide to the Board as-built plans and drawings of the Modifications referred to in this Part within ninety (90) days of completion of the Modification. These plans and drawings shall be stamped by an Engineer

if Fisheries and Oceans intend to have their own quarry for this then it would require an amendment to the water licence, if just purchasing the quarry material within municipal boundaries the only other authority I can think of would be either Community & Government Services or the Municipality for the material, if outside of municipal boundaries then quarry permit would need to be applied for from either CIRNAC or QIA, subject to land ownership.

Merry Christmas and Happy New Year!

Richard
