Hello Edward

I have reviewed the Approval Application and found a few deficiencies that need to be completed in accordance with the attached SIG and Guide, before we can further process the application.

Please provide the following:

1) Cover letter addressed to the Manager of Licensing, that includes a brief description of the undertaking in both English and Inuktitut. This should include a brief description of where the project is, why it is being done, what exactly is being done, who designed it, the general size of the water crossing, where any waste generated will be deposited, what will be done in the case of a spill, is the road going to be a permanent, etc. This can all be summarized in a short 4-6 sentence paragraph since spill response etc. will be in accordance with the municipal Licence, but this need to be included in the application. Think of it as if all you have is the summary and application and you need to know what the project is about.

2) In the description mentioned above, please also include any brief Plans that were generated prior to the start of construction. Some indication the an engineering firm has designed the water crossing.

2) Don't forget, the translated project summary

3) Correct coordinates and please include a map showing the location. A Google Maps is acceptable. Current coordinates land about 10 km south of Gjoa Haven.

Regards,
Derek
