Hi Phyllis,

As per the fax that you send me and our telephone conversation I will answer the questions to the best of my notice on the concerns that came from the public Community of Taloyoak as listed below.

1. Q . Do any of the commercial fishing areas impact directly on Barrow where they plan to do their drilling. A. No impact.
2. Q. Do residents of Taloyoak have any issues related to waste and water use in Barrow lake project. A . No
3. Q . NWB has no jurisdiction over wildlife in the area. A. Yes we will go to NWMB and NIRB about the calving ground (Caribou ,Musk ox)
4. Q. Can you confirm whether or not residents of Taloyoak do commercial fishing on the lake where Indicator minerals will be doing their drilling. A . No
5. Can you confirm that the area of barrow lake project is where fuel drum have been left and the area has been unreclaimed. A. Yes the same Company (Indicator Minerals) have left fuel drums on the Grail Property just 70 km northwest of Taloyoak as attached information on Developing Projects Grail. Hunters from Taloyoak have seen empty fuel drums around the Grail Project.

Developing Projects

Grail

Diamond Rights:

80% Indicator Minerals Inc. / 20% Hunter (Core)

Property Size:

16 Five Year Prospecting Permits & 42 Mineral Claims = 1,148,689 acres

Grail Tilt Sampling

[Click here to view enlarged...](#)

Overview:

The Grail Property is located on the Boothia Peninsula approximately 70km northwest of the community of Taloyoak in the Nunavut Territory and was acquired based on regional heavy mineral samples collected by Hunter Exploration in 2003.

Kimberlite Indicator minerals, including high chrome G10 garnets, have been recovered in five spatially separate areas on the property. During the 2005 field program IME collected 99 (+25 follow up) heavy mineral samples on the project area. These samples were flown to the SRC laboratory for expedited processing and analysis. Results confirmed the presence of indicator minerals and an additional 42 mineral claims totalling more than 108,000 acres was acquired.

Grail has emerged as a key project based on the 2004 and 2005 heavy mineral sampling results. Results from the 2006 sampling campaign will be used to position airborne geophysical surveys designed to locate the source of the kimberlite indicator minerals.

Borden

Diamond Rights:

Can earn up to 70% interest from Committee Bay Resources (CBR: TSX-V)

Property Size:

9 Five Year Prospecting Permits = 508,240 acres

Overview:

The Borden Property is located on western Baffin Island on the Borden Peninsula, approximately 110km southeast of the community of Arctic Bay and Nanisivik Mines in the Nunavut Territory.

Heavy mineral samples collected in 2004 yielded kimberlite indicator minerals in one area of the property. 30 heavy mineral samples were collected in 2005 in an effort to identify the source area(s) for these indicator minerals. Also in 2004, Patrician Diamonds Ltd. (PXC:
