RE: 2BE-BAR, Indicator Minerals Inc. Barrow Project, Kugaaruk, Nunavut

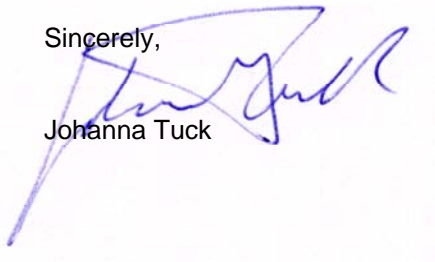

I have reviewed that comments in your letter dated May 10, 2007 regarding the Barrow Project application submitted to the Nunavut Water Board (NWB). I have revised the Environmental Procedures Plan (EPP), Spill Contingency Plan (SCP) and the Abandonment and Restoration Plan (ARP) that had been submitted with the application.

Indicator Minerals Inc. has initiated the data sharing agreement process and requesting the location of archaeological sites in the Barrow Project area that will be avoided. Please refer to the EPP pages 4 and 5 to review the revisions made to cultural and heritage issues.

Thank you for your comments regarding the Barrow Project application, please do not hesitate to contact me if you have any questions or comments regarding the revisions in the Environmental Procedures Plan, Spill Contingency Plan or Abandonment and Restoration Plan.

Sincerely,

Johanna Tuck
