Re: Water Licence for Twin Mining Corp.

Find attached an application for use of water in the area of our mining claims on Brodeur Peninsula, Nunavut, Canada. In addition, a completed "Exploration/Remote Camp Supplementary Questionnaire" and an executive summary (English and Inuktitut) which includes a map, are also attached.

Because the Summer Program is dependant on previous work, it was difficult to provide any kind of useful detail for this application until recently. I am aware that the Water Permit may take a while to be granted and since the time window for efficient work in the area is small, I would greatly appreciate a temporary work permission. This would enable the company to proceed with the program as early as July.

Meanwhile, I can be reached at the above co-ordinates for additional questions or concerns regarding our program. Rest assure that we have always worked using sound environmental practices and intend to complete this program well within the regulations. Your help in this matter will surely enhance the success of the exploration program.

Respectfully submitted,

Richard Roy
