| Section 3. Hazards Identification. | | | | | |
|------------------------------------|--|--|--|--|--|
| Potential Health Effects | Non Irritating to slight transient irritation to skin and eyes, but no permanent damage. Relatively non-toxic via ingestion. This product has a low vapour pressure and is not expected to present an inhalation exposure at ambient conditions. Upon heating to high temperatures, or mechanical actions which may produce vapours or mists, inhalation of product may cause irritation of the breathing passages. For more information, refer to Section 11. | | | | |

| Section 4, First | Ald Measures |
|-------------------|---|
| Eye Contact | IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek medical attention. |
| Skin Contact | Remove contaminated clothing - launder before reuse. Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. Seek medical attention. |
| Inhalation | Evacuate the victim to a safe area as soon as possible. If the victim is not breathing, perform artificial respiration. Allow the victim to rest in a well ventilated area. Seek medical attention. |
| Ingestion | DO NOT induce vomitting because of danger of aspirating liquid into lungs. Seek medical attention. |
| Note to Physician | Not available |

| Flammability | May be combustible at high temperature. | Flammable Limits | Not available |
|---|---|---|--|
| Flash Points | OPEN CUP: ≥166°C (334.4°F) (Cleveland) | Auto-Ignition Temperature | Not available |
| Fire Hazards In Presence of Various Substances | Low fire hazard. This material must be heated before ignition will occur. | Explosion Hazards in Presence of Various Substances | Do not cut, weld, heat, drill or pressurize empty container. Containers may explode in heat of fire. |
| Products of Combustion | Carbon oxides (CO, CO2), nitrogen oxides (No compounds (POx), emoke and irritating vapours as | lx), sulphur oxides (products of incomplet | SOx), sulphur compounds (H2S), phosphorus e combustion. |

| Section 6. Accidental Release Measures | | | | |
|--|--|--|--|--|
| Material Release or Spill | Consult current National Emergency Response Guide Book (NAERG) for appropriate spill measures if necessary. Extinguish all ignition sources. Stop leak if safe to do so. Dike spilled material. Use appropriate inert absorbent material to absorb spilled product. Collect used absorbent for later disposal. Avoid contact with spilled material. Avoid contaminating sewers, streams, rivers and other water courses with spilled material. Notify appropriate authorities immediately. | | | |

| Section 7. F | Section 7. Handling and Storage | | | | |
|--------------|---|--|--|--|--|
| Handling | Avoid contact with any sources of ignition, flames, heat, and sparks. Avoid skin contact. Avoid eye contact. Avoid inhalation of product vapours or mists. Empty containers may contain product residue. Do not pressurize, cut, heat, or weld empty containers. Do not reuse containers without commercial cleaning and/or reconditioning. Personnel who handle this material should practice good personal hygiene during and after handling to help prevent accidental ingestion of this product. Properly dispose of contaminated leather articles including shoes that cannot be decontaminated. | | | | |
| Storage | Store in dry, cool, well-ventilated area. Keep container tightly closed. Store away from incompatible and reactive materials (See section 5 and 10). | | | | |

| | re Controls Personal Protection |
|--------------------------|---|
| Engineering Controls | For normal application, special ventilation is not necessary. If user's operations generate vapours or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit. Make-up air should always be supplied to balance a removed by exhaust ventilation. Ensure that eyewash station and safety shower are close to work-station. |
| Personal Protection Eyes | The selection of personal protective equipment varies, depending upon conditions of use. Eye protection (i.e., safety glasses, safety goggles and/or face shield) should be determined based on conditions of use, product is used in an application where splashing may occur, the use of safety goggles and/or a face shield should be considered. |
| Body | Wear appropriate clothing to prevent skin contact. As a minimum long sleeves and trousers should be worn. |
| Respiratory | Where concentrations in air may exceed the occupational exposure limits given in Section 2 (and those applicable to you area) and where engineering, work practices or other means of exposure reduction are not adequate, NiOSH approve respirators may be necessary to prevent overexposure by inhalation. |
| Hands | Wear appropriate chemically protective gloves. When handling hot product ensure gloves are heat resistant and insulated. |
| Foot | Wear appropriate footwear to prevent product from coming in contact with feet and skin. |

| Corrosivity | Copper corrosion, 3h, 100°C (ASTM D0130): 1 | а | | | |
| Stability | The product is stable under normal handling and storage conditions. | Hazardous Polymerization | Will not occur under normal working conditions. | | |
| Incompatible Substances / Conditions to Avoid | Reactive with oxidizing agents, reducing agents and acids. | Decomposition Products | May release COx. NOx, SOx. H2S, POx. smoke and irritating vapours when heated to decomposition. | | |

| Section 11. Toxicological in | formation |
|---|---|
| Routes of Entry | Skin contact, eye contact, inhalation and ingestion, |
| Acute Lethality | Not available |
| Chronic or Other Toxic Effects Dermal Route: | Prolonged or repeated contact may cause skin irritation characterized by dermatitia or oil acne. |
| Inhalation Route: | Negligible breathing hazard at normal temperatures (up to 38°C) or recommended blending temperatures. Elevated temperatures or mechanical action may form vapours, mists or fumes. Inhalation of oil mists or vapours from hot oil may cause irritation of the upper respiratory tract. |
| Oral Route: | Low toxicity; has laxative effect. |
| Eye Irritation/Inflammation: | Repeated or prolonged contact may cause transient imitation, but no permanent damage. |
| Immunotoxicity: | Not available |
| Skin Sensitization: | This product is not expected to be a skin sensitizer, based on the available data and the known hazards of the components. |
| Respiratory Tract Sensitization: | This product is not expected to be a respiratory tract sensitizer, based on the available data and the known hazards of the components. |
| Mutagenio; | This product is not expected to be a mutagen, based on the available data and the known hazards of the components. |
| Reproductive Toxicity: | This product is not expected to be a reproductive hazard, based on the available data and the known hazards of the components. |
| Teratogenicity/Embryotoxicity: | This product is not expected to be a teratogen or an embryotoxin, based on the available data and the known hazards of the components. |
| Cardnogenicity (ACGIH): | This product is not known to contain any chemicals at reportable quantities that are listed as A1 or A2 carcinogens by ACGIH. |
| Carcinogenicity (IARC): | This product is not known to contain any chemicals at reportable quantities that are listed as group 1, 2A or 2B carcinogens by IARC. |
| Carcinogenicity (NTP): | This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by NTP. |
| Carcinogenicity (IRIS): | Not available |
| Carcinogenicity (OSHA): | This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by OSHA. |
| Other Considerations | No additional remark |

| Fire Fighting Media and Instructions | NAERG98, GUIDE 171, Substances (low to moderate hazard). If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (0.5 mile) in all directions; also, consider initial evacuation for 800 meters (0.5 mile) in all directions. Shut off fuel to fire if it is possible to do so without hazard. If this is impossible, withdraw from area and let fire burn out under controlled conditions. Withdraw immediately in case of rising sound from venting safety device or any discolouration of tank due to fire. Cool containing vessels with water spray in order to prevent pressure build-up, autoignition or explosion. SMALL FIRE: use DRY chemicals, foam, water spray or CO2. LARGE FIRE: use water spray, fog or foam. For small outdoor fires, portable fire extinguishers may be used, and self contained breathing appearatus (SCBA) may not be required. For all indoor fires and any significant outdoor fires, SCBA is required. Respiratory and eye protection are required for fire fighting personnel. |

| Section 6. Accid | iental Release Measures |
|------------------------------|---|
| Material Release or Spill | NAERG98, GUIDE 171, Substances (low to moderate hazard). ELIMINATE ALL IGNITION SOURCES. Avoid contact. Stop leak if without risk. Contain spill. Absorb with inert absorbents, dry clay, or distomaceous earth. Avoid inhaling dust of diatomaceous earth for it may contain sitica in very fine particle size, making this a potential respiratory hazard. Place used absorbent in closed metal containers for later diaposal or burn absorbent in a suitable combustion chamber. DO NOT FLUSH TO SEWERS, STREAMS OR OTHER BODIES OF WATER. Check with applicable jurisdiction for specific disposal regulrements of spilled material and empty containers. Notify the appropriate authorities immediately. |

| Section 7. H | andling and Storage |
|--------------|--|
| Handling | Avoid inhalation and skin contact especially when handling used oil. Keep away from sources of ignition. DO NOT reuse empty containers without commercial cleaning or reconditioning. Practice good personal hygiene. Wash hands after handling and before eating. Launder work clothes frequently. Discard saturated leather goods. |
| Storage | Store in tightly closed containers in cool, dry, isolated, well-ventilated area, and away from incompatibles. |

| Section 8. Exposu | re Controls/Personal Protection |
|-------------------------------|--|
| Engineering Controls | For normal application, special ventilation is not necessary, if user's operations generate vapours or mist, use ventilation to keep exposure to sirborne contaminants below the exposure limit. Make-up air should always be supplied to balance air removed by exhaust ventilation. Ensure that eyewash station and safety shower are close to work-station. |
| Personal Protection - Eyes | The selection of personal protective equipment varies, depending upon conditions of use. Eye protection (i.e., safety glasses, safety goggles and/or face shield) should be determined based on conditions of use. If product is used in an application where splashing may occur, the use of safety goggles and/or a face shield should be considered. |
| Body | Wear appropriate clothing to prevent skin contact. As a minimum long sleeves and trousers should be worn. |
| Respiratory | Where concentrations in air may exceed the occupational exposure limits given in Section 2 (and those applicable to your area) and where engineering, work practices or other means of exposure reduction are not adequate. NIOSH approved respirators may be necessary to prevent overexposure by inhalation. |
| Hands | Wear appropriate chemically protective gloves. When handling hot product ensure gloves are heat resistant and insulated. |
| Feet | Wear appropriate footwear to prevent product from coming in contact with feet and akin. |

Section 13. Disposal Considerations

Waste Disposal

Spent/used/waste oil may meet the requirements of a hazardous waste. Consult your local or regional authorities, Preferred waste management priorities are: (1) recycle or reprocess; (2) incineration with energy recovery; (3) disposal at licensed waste disposal facility. Ensure that disposal or reprocessing is in compliance with government requirements and local disposal regulations.

Section 14. Transport Information

TDG Classification Not controlled under TDG (Canada). Special Provisions Not applicable. for Transport

Section 15. Regulatory Information Other This product is acceptable for use under the provisions of WHMIS-CPR. All components of this formulation are listed on the CEPA-DSL (Domestic Substances List). Regulations All components of this formulation are listed on the US EPA-TSCA Inventory. All components of this formulation are listed on EINECS or exempt. This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR. Please contact Product Safety for more Information. DSD/DPD (Europe) Not classified under the Dangerous HCS (U.S.A.) Not controlled under the HCS (United States). Substances or Dangerous Preparations Directives. ADR (Europe) DOT (U.S.A) (Pictograms) (Pictograms) Health Hazard (7 Reling 0 Insignificant HMIS (U.S.A.) NFPA (U.S.A.) | Section 3, Hazards Identification. | | |
|------------------------------------|--|--|
| Potential Health Effects | Non irritating to slight transient irritation to skin and eyes, but no permanent damage. Relatively non-toxic via ingestion. This product has a low vapour pressure and is not expected to present an inhalation exposure at ambient conditions. Upon heating to high temperatures, or mechanical actions which may produce vapours or mists, inhalation of product may cause irritation of the breathing passages. For more information, refer to Section 11. | |

| Section 4. First | Aid Measures |
|-------------------|---|
| Eye Contact | IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelide open. Seek medical attention, |
| Skin Contact | Remove contaminated clothing - launder before reuse. Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. Seek medical attention. |
| Inhalation | Evacuate the victim to a safe area as soon as possible. If the victim is not breathing, perform artificial respiration. Allow the victim to rest in a well ventilated area. Seek medical attention. |
| Ingestion | DO NOT Induce vomitting because of danger of aspirating liquid into lungs. Seek medical attention. |
| Note to Physician | Not available |

| Flammability | May be combustible at high temperature. | Flammable Limits | Not available. |

Fire Fighting Media and Instructions

NAERG96, GUIDE 171, Substances (low to moderate hazard). If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (0.5 mile) in all directions; also, consider initial evacuation for 800 meters (0.5 mile) in all directions. Shut off fuel to fire if it is possible to do so without hezard. If this is impossible, withdraw from area and let fire burn out under controlled conditions. Withdraw immediately in case of rising sound from venting safety device or any discolouration of tank due to fire. Cool containing vessels with water sorey in order to prevent pressure build-up, autoignition or explosion. SMALL FIRE: use DRY chemicals, foam, water spray or CO2. LARGE FIRE; use water spray, fog or foam. For small outdoor fires, portable fire extinguishers may be used, and self contained breathing apparatus (SCBA) may not be required. For all indoor fires and any significant outdoor fires, SCBA is required. Respiratory and eye protection are required for fire fighting personnel.

Section 6. Accidental Release Measures

Section & Exposure Controls/Personal Protection

Material Release or Spill

NAERG96, GUIDE 171, Substances (low to moderate hazard). ELIMINATE ALL IGNITION SOURCES. Avoid contact. Stop leak if without risk. Contain spill, Absorb with inert absorbents, dry clay, or distornaceous earth. Avoid inhaling dust of diatomaceous earth for it may contain silica in very fine particle size, making this a potential respiratory hazard. Place used absorbent in closed metal containers for later disposal or burn absorbent in a suitable combustion chamber. DO NOT FLUSH TO SEWERS, STREAMS OR OTHER BODIES OF WATER. Check with applicable jurisdiction for specific disposal requirements of spilled material and empty containers. Notify the appropriate authorities immediately.

| Section 7. Handling and Storage | | | | | |
|---------------------------------|--|--|--|--|--|
| Handling | Avoid inhalation and skin contact especially when handling used oil. Keep away from sources of ignition. DO NOT reuse empty containers without commercial cleaning or reconditioning. Practice good personal hygiene. Wash hands after handling and before eating, Launder work clothes frequently. Discard saturated leather goods. | | | | |
| Storage | Store in tightly closed containers in cool, dry, isolated, well-ventilated area, and away from incompatibles, | | | | |

| Engineering Controls For normal application, special ventilation is not necessary. If user's operations generate vapours or mist, use ventilation to |
|---|
| |
| keep exposure to airborne contaminants below the exposure limit. Make-up air should always be supplied to balance a removed by exhaust ventilation. Ensure that eyewash station and safety shower are close to work-station. |

Personal Protection - The selection of personal protective equipment varies, depending upon conditions of use.

Eyes Eye protection (i.e., safety glasses, safety goggles and/or face shield) should be determined based on conditions of use. If product is used in an application where splashing may occur, the use of safety goggles and/or a face shield should be considered.

Body Wear appropriate clothing to prevent skin contact. As a minimum long sleeves and trousers should be worn.

Respiratory Where concentrations in air may exceed the occupational exposure limits given in Section 2 (and those applicable to your area) and where engineering, work practices or other means of exposure reduction are not adequate, NIOSH approved respirators may be necessary to prevent overexposure by inhalation.

Hands Wear appropriate chemically protective gloves. When handling hot product ensure gloves are heat resistant and

Feet Wear appropriate footwear to prevent product from coming in contact with feet and skin.

| Corrosivity Copper corrosion, 3h, 100°C (ASTM D0130): 1b | | | | |
| Stability | The product is stable under normal handling and storage conditions. | Hazardous Polymerization | Will not occur under normal working conditions. | |
| Incompatible Substances / Conditions to Avoid | Reactive with oxidizing agents, acids, halogens and halogen compounds. | Decomposition Products | May release COx, SOx, H2S, CaOx. alky mercaptans, sulfides, aldehydes, methacrylat monomers, smoke and irritating vapours whe heated to decomposition. | |

| Section 11. Toxicological In | oformation |
|---|--|
| Routes of Entry | Skin contact, eye contact, inhalation, and Ingestion. |
| Acute Lethality | Based on toxicity of components, acute onal toxicity (LD50): >5000 mg/kg (rat) acute dermal toxicity (LD50): >2000 mg/kg (rabbit) acute dermal toxicity (LD50): >2500 mg/m³/4h (rat) |
| Chronic or Other Toxic Effects Dermal Route: | Prolonged or repeated confact may cause skin imitation characterized by dermetitis or oil acne. |
| Inhalation Route: | Negligible breathing hazard at normal temperatures (up to 38°C) or recommended blending temperatures. Elevated temperatures or mechanical action may form vapours, mists or fumes. Inhalation of oil mists or vapours from hot oil may cause irritation of the upper respiratory tract. |
| Oral Route: | Low toxicity; has laxative effect. |
| Eye Irritation/Inflammation: | Repeated or prolonged contact may cause transient irritation, but no permanent damage. |
| Immunotoxicity: | Not available. |
| Skin Sensitization: | This product is not expected to be a skin sensitizer, based on the available data and the known hazards of the components. |
| Respiratory Tract Sensitization: | This product is not expected to be a respiratory tract sensitizer, based on the available data and the known hazards of the components. |
| Mutagenic: | Base oil exhibited negative mutagenic activity toward: (a) Salmonella Typhimurium TA98 using the Modified Ames Assay for Petroleum Product; (b) Salmonella-Escherichia coli/Mammalian-Microsome Reverse Mutation Assay (Ames test) with a Confirmatory Assay; (c) Structural Chromosomal Aberrations in Chinese Hamster Ovary (CHO) Cella. |
| Reproductive Toxicity: | This product is not expected to be a reproductive hazard, based on the available data and the known hazards of the components. |
| Teratogenicity/Embryotoxicity: | This product is not expected to be a teratogen or an embryotoxin, based on the available data and the known hazards of the components. |
| Carcinogenicity (ACGIH): | This product is not known to contain any chemicals at reportable quantities that are listed as A1 or A2 carclnogens by ACGIH. |
| Carcinogenicity (IARC): | This product is not known to contain any chemicals at reportable quantities that are listed as group 1, 2A or 2B carclnogens by IARC. |
| Carcinogeniaity (NTP): | This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by NTP. |
| Carcinogenicity (IRIS): | Not available. |
| Carcinogenicity (OSHA): | This product is not known to contain any chemicals at reportable quantities that are itsted as carcinogens by OSHA. |
| Other Considerations | No additional remark. |
