Subject: Silvermet Inc. Muskox Project – Request for Open Burning

Dear Sirs:

On May 10, 2010 the Nunavut Water Board (NWB) received a request from Aurora Geoscience, on behalf of Silvermet, for open burning in order to complete restoration activities (copy attached). On May 13, 2010 this request went out to interested parties for review and comments. Comments were received from Kitikmeot Inuit Association, Environment Canada and Indian and Northern Affairs. Copies of these submissions are available on our ftp site at the link provided. As indicated in a follow-up letter to Aurora on May 28, 2010, copy attached, the NWB requested the submission of outstanding items as per the terms and conditions of your current water licence. On October 1, 2010 Aurora advised that they are no longer representing your company on this file.

Please advise by return mail or email whether or not you wish to continue with this request. Please also be advised that the annual reports and annual water use fees remain outstanding.

Sincerely,

Original signed by:

Phyllis Beaulieu  
Manager of Licensing
