Mr. Thomas Kudloo
Chair of the Nunavut Water Board
P.O. Box 309
Baker Lake NT X0C 0A0

Dear Mr. Kudloo:

Re: 2002 Inspections and Future Clean-Up Plan for the Kiggavik Sissons Project

Enclosed please find, with our compliments, one copy of a report entitled "2002 Inspections and Future Clean-Up Plan for the Kiggavik Sissons Project, Nunavut".

As the title implies, the report describes the two site visits conducted in the summer of 2002 with a complete photographic record taken during each visit. It defines the current status of the site as well as the plans for future clean-up in the summer of 2003. Additionally, the report outlines in conceptual terms, the final decommissioning plans for the site in the event that a future decision is taken by COGEMA Resources Inc. to conclude all further activity on the project. We believe these site visits and report conclude our obligations for the current year with regard to the Kiggavik Sissons Project.

It is our intention to submit a work plan and schedule at the end of next spring for KIA and INAC review prior to commencing the 2003 program.

We trust that you will find this report informative and would like to thank each of you for your participation in recent discussions regarding this project.

Sincerely,

J.C. Rippert,
Vice President Exploration

G. B. Acott,
Director, Environmental Programs
