RE: Non-Technical Project Summary, Yava Property, Nunavut.

Dear Nunavut Water Board,

The Yava Property is approximately 450 km northeast of Yellowknife, in the Mackenzie Mining District, Territory of Nunavut, Canada. It is between the Hackett and Back Rivers, and centred at 65°36'N and 107°56'W within map sheet NTS 76/G-12 (Figure 1).

The Yava Property is in an early stage of exploration. Pacifica Resources Ltd. ("Pacifica", "Company") is 100% owner and operator of the Yava Mining Lease No. 3175 and Claims (figure 02). Pacifica is planning a geophysical and geological program starting March 01, 2005 and ending October 31, 2005. Geophysical crews will conduct HLEM & MAG surveys over a 420 line-kilometre grid and geology crew will conduct mapping and prospecting over the same area. Flights into the property will be by fixed-wing aircrafts (Twin Otter on floats) from Yellowknife. Air transportation on site will be by chartered helicopter. A 25-man camp will be erected at the southern tip of Retort Lake (Figure 02) on Crown Land.

Although such work has previously been done on the property in 1974 to 1976, this data is outdated. The objective of the 2005 exploration program is to collect new data using modern instruments, techniques, and geological models to better understand the nature of the mineral occurrences on the property and to discover new targets. Although no longer-term plan can be projected at this point in time, the Company hopes to see the Yava Property go through a drill program in the years to follow in the event results prove favourable.

Please contact Pacifica for further information at the address above. Thank you.

Sincerely,
PACIFICA RESOURCES LTD.

Phu Van Bui, B.Sc., G.I.T.
