**Re: 8BC-THE - Road Alignment Quarry Site Geochemistry - Final Report**

The Meadowbank road construction represents a major project component of the larger Meadowbank Mine Project. INAC would like to conduct a more detailed technical review regarding surface water flow and surface water quality. Although the Road Alignment Quarry Site Geochemistry - Final Report (October 2005) was presented during the NIRB process, INAC would like to further examine the surface water impacts of this project component. Therefore, INAC is requesting a time extension on providing intervener comments until May 18<sup>th</sup>, 2007.

Should you have any questions or comments, please do not hesitate to contact me at (867) 975-4548 or by email at [BathoryS@ainc-ianc.gc.ca](mailto:BathoryS@ainc-ianc.gc.ca).

Sincerely,
