Re: Land Use Application NIRB 00CN021; Mineral Exploration on Boothia Peninsula
(Jeffrey Heidema, Cominco)

Due Date: May 24, 2000

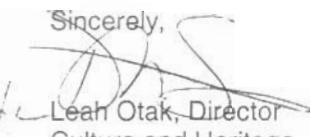

Dear Ms. Joudrey:

At your request, the Department of Culture and Heritage, Government of Nunavut, has reviewed the above-noted application. Our recommendations follow.

We recommend approval of the above-cited research application, on the condition that the proponent's activities avoid the known archaeological sites listed in Attachment #1. The proposed study location falls within a very high-density area for registered archaeological sites. The information contained in Attachment #1 is provided solely for the purpose of the proponent's land use activities as described in the land use application, and must otherwise be treated confidentially by the proponent.

The attached conditions specify plans and methods of site protection and restoration to be followed by the permittee if an archaeological site is encountered or disturbed in the course of the land use activity.

Sincerely,

Leah Otak, Director
Culture and Heritage
Department of Culture, Language, Elders and Youth

Encl.

| RESEARCHER NAME | Gardner, D. |
| DATE OBSERVED | 1977// |
| COLLECTIONS | 1977 Gardner, D. ASC acc. 3202 |
| BIBLIOGRAPHIC REF. | ASC ARCHIVES Ms. 1999 ASC ARCHIVES Ms. 3391 |
| REMARKS | Seven semi-subterranean houses, 16 caches, approx. 35 tent rings and 1 recent box burial were observed at the site. The site may be part of or associated with the Nudlukta Site (OkJt-2) , (Learmonth, '48). The site has been utilized at least from Early Dorset through middle Dorset and Thule culture times. On the W. side of the river there appears to be at least two deeply excavated semi-subterranean houses and an enormous area of tent rings and caches. A conservative estimate of the number of tent rings is 80 to 100. An old and very massive fish weir is still at S. end of site. The W. side of a river is generally at a low elevation, and may be mostly a Thule culture occupation. |

| | |
|--------------------|---|
| RESEARCHER NAME | Gardner, D |
| DATE OBSERVED | 1977// |
| BIBLIOGRAPHIC REF. | ASC ARCHIVES Ms. 1999 |
| REMARKS | The site consists of five tent rings, and four caches. The tent rings are relatively undisturbed and are round, heavy walled structures from 3-4 m. across. The caches are massively built and, in at least one case, may have originally been tent rings. No diagnostic materials recovered. However, a Thule to recent cultural association is suggested. |
