**RE: Summary Report, Permit NWB2BOO0001**

Work on the Boothia summer program was completed on August 11 with the demobilization of all seven field crew and the majority of field gear. A full tent of field gear remained at the camp site for potential utilization in future work. Unfortunately, our work did not uncover targets of sufficient merit to warrant further summer follow-up. The camp gear, including one fuel cache location, is scheduled for demobilization this summer prior to the expiration of the water permit. As per permit, all waste from the summer program was removed by barrel and disposed of in Resolute. Grey water was channeled to a sump. On completion of the reclamation we will send you a final report, including pictures, that will illustrate the final clean-up status. If there is further information that you require from me please contact me at 604-685-3070.

Sincerely,

A handwritten signature in dark ink, appearing to read 'JH Heidema', written over a light blue horizontal line.

Jeffrey H. Heidema  
Geologist, Land Administration
