ABANDONMENT AND RESTORATION

38. Provide a detailed description of progressive and final abandonment and restoration activities at the site.

All drill sites will be restored to prior conditions, or as close as possible. All garbage will be removed for incineration or disposal at either the Lupin Mine or the Yellowknife Solid Waste Disposal Facility. Absorbent pads/mats will be used during fuel transfer, and situated under the drill rig at strategic sites. Any on ice drill cuttings will be scraped clean and removed to an on-land location. All scrap material and equipment will be returned to Yellowknife. Fuel drums will be returned to a local agent for proper treatment.

BASELINE DATA

- 38. Has or will any baseline information be collected as part of this project? Provide bibliography. No baseline studies have been conducted as work has been of a very preliminary nature and limited in scope, photos of the drill sites will be taken prior to work, and again after reclamation to ensure a complete clean up and restoration.
