RE: Updates to License NWB 2CNT0406

Hi Phyllis,

As per our discussion this morning, please find attached the requested amendments to the Spill Response Plan and the Abandonment and Restoration Plan. If you have any questions or comments, please contact me at (604) 668-8355.

Thank you,

Janet Miller
Geologist

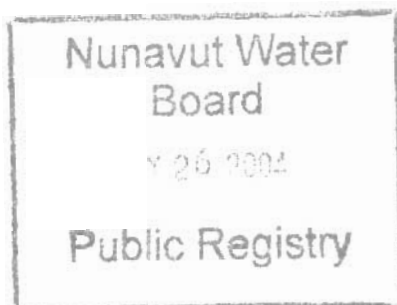

For further information, please contact the Company at 604-668-8355

Contwoyto Lake area, Nunavut**

Abandonment and Restoration Plan

Upon completion of the Land Use Operation on the JH claims, (NTS 76 E) the following steps and procedures will be followed to allow proper abandonment and reclamation of the area:

1. All fuel drums and drilling equipment will be removed from the site immediately upon completion of the hole.
2. On-ice drill cuttings will be scraped clean and removed to an on land sump located more than 30m from the ordinary high water mark on an on-going basis.
3. All drilling sumps (if used) will be back-filled, burying the cuttings and sludges if appropriate.
4. If the crew members discover waste of any type left behind by others, every effort will be made to remove it from the area and have it disposed of in an acceptable manner.
5. Each drill site will be inspected to ensure that all garbage (combustible and non-combustible) has been collected and removed from the area.
6. A last inspection will ensure that there is no remaining material at the site and that there is little/no evidence for Navigator's land use activity.
7. As the activities are based out of Lupin and will only entail one season of work, seasonal closures will not affect the area.
