

EMERGENCY SPILL RESPONSE PLAN

- 1. Identify nature and source of spill - fuel drums, hydraulic hose etc.**
- 2. Take Immediate action to control the spill at source - shut off engine, seal leaking drum with Plug 'n Dyke etc.**
- 3. Notify on-site supervising geologist.**
- 4. Open up spill response kit and use appropriate method to clean up spilled material.**
- 5. On-site Supervising Geologist will go to the spill site and ensure appropriate and complete clean-up of spilled material.**
- 6. Dispose of waste material.**
- 7. Each spill to be documented by on-site Supervising Geologist.**

**Mike Gunning
Geologist
Canadian Exploration**
