Re: NWB Licence No. NWB2INU0103

Dear Ms. Becker:

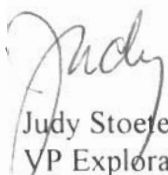

Rhonda plans to continue exploration on its Inulik exploration project in the coming year and I need to know if I can get an extension on the existing Licence or should I begin to apply for a new one.

One change to the original application is that I would like to place a satellite camp on the eastern side of the property, on Crown Lands. I have attached a location map as well as the initial sketch of the boundaries of the camp. One other change to the application is that there may be an increase in the number of days the camp is occupied, from 2 months up to 4 months if I am able to get a drill program going in the spring. The Anteater camp will not be used during the upcoming 2003 work season.

We are using Discovery Expediting out of Yellowknife who will set up the new camp in accordance with regulations. The description of Camp Location (Point 9 in the original application) would remain the same.

Please let me know if I have to re-apply for a new licence and I will start that immediately.

Sincerely,

Judy Stoererau
VP Exploration
