Re: Land Use Permit I96C104

Holman
Ulukhaktuk
ᑭᑭᑭᑭᑭᑭᑭᑭ

The Kitikmeot Inuit Association has received your update of activities for permit I97C104. After reviewing the file, I have a number of concerns and issues that I would like to address. There are a number of items in the file that I will review in the following points:

Pelly Bay
Akvilikyook
ᑭᑭᑭᑭᑭᑭᑭᑭ

1) Canamera applied for a permit to undertake exploratory drilling on IOL parcels CO-52 and CO-60 in September 1996. An application fee and \$80 of land use fees were included. A permit for exploratory drilling work was issued in October 1996 that is valid from October 9 1996 until October 11, 1996.8

Taloyoak
ᑭᑭᑭᑭᑭᑭᑭᑭ

2) A letter dated October 25, 1996 requested that the Permit be amended to include CO-40. This permission was never given. If Canamera has done work on this parcel, please let me know immediately. Any further work on this permit would require a formal amendment to this permit.

Bathurst Inlet
Kingaok
ᑭᑭᑭᑭᑭᑭᑭᑭ

3) In a letter dated June 4, 1997, Canamera indicated that they were going to set up a camp again. This was never permitted under I96C104. In a fax to Jack Kaniak dated July 7, 1997, Canamera indicated that camps had actually been set up on parcels Co-60 and CO-29. Access to CO-29 was never issued, however, under this permit. In your letter of April 24, 1998, you indicate that you wish to re-establish a 6-8 Weather Haven exploration camp in CO-52. Due to the fact that the original permit did not include permission to set-up a camp, I cannot at this time allow a camp, unless you apply for an amendment to your permit.

Bay Chimo
Omingnaktok

4) An annual report, which was due in October 1997, has not been received by KIA Lands. This annual report should indicate exactly what work was done, where, by whom, and the total land use area used. The details should include the co-

ordinates of all drill holes and an original map illustrating the location of all activities.

- 5) Land use fees for 1996-97 should be forwarded to this office with the report. A total of \$80 was paid in September 1996 towards the first year's land use fees. Please ensure that the area used for the "camps" and all drill areas are calculated into the land use area.
- 6) KIA Lands requires original maps indicating the proposed area of work.
- 7) A water licence is required for all camp and drilling activities. Permission to access Inuit Owned Lands does not affect the Permittee's responsibilities for ensuring that they comply with all laws of general application. If Canamera already has a water licence for this work, please forward us a copy.
- 8) We have no copy of the proof of sub-surface rights in our file. Please forward a copy of the claim certificate to our office.

Please ensure that you forward all the required documentation to this office as soon as possible. Thank you.

Sincerely,

A handwritten signature in black ink, appearing to read 'Wynet Smith', with a long horizontal flourish extending to the right.

Wynet Smith, Lands Manager

c.c. Philippe de Pizzo, Nunavut Water Board
