Dear Sir:

Enclosed please find the following reports:

- 1) Oil and Hazardous Material Spill Contingency Plan; and,
- 2) General Contingency Plan.

We are filing these reports on behalf of our client, Qikiqtaaluk Corporation, in respect to a mineral exploration project which the company is conducting at Pistol Lake.

We trust that you will find these reports to be acceptable in covering the necessary topics. The reports are currently posted in the camp kitchen and all staff have been notified to be familiar with the procedures outlined therein.

As we have not previously completed such reports under the jurisdiction of the Nunavut Water Board, we remain open to suggestions as to how we might improve such reports in the future. Your comments are welcome.

Yours very truly,
WATTS GRIFFIS AND McOUAT LIMITED
