Re: Land use application NIRB 00EN101; Mineral exploration on the Grinnell Peninsula, Devon Island
(Noranda Inc.)
Due Date: April 13, 2000

Dear Ms. Levi:

At your request, the Prince of Wales Northern Heritage Centre has reviewed the above-noted application. Our recommendations follow.

We recommend approval of the above-cited application on the condition that the known archaeological sites as listed in Attachment #1 are avoided and an archaeological inventory and assessment of the entire land use area is conducted between the coordinates of 76.0N - 76.25N, 93.5W - 95.5W, as supplied by the proponent.

The attached conditions specify plans and methods of site protection and restoration to be followed by the permittee if an archaeological site is encountered or disturbed in the course of the land use activity.

Regards,

Original Signed By
Charles D. Arnold

Charles D. Arnold, Director
Culture, Heritage and Languages Division

Prince of Wales Northern Heritage Centre

c. Nunavut Impact Review Board
Douglas Stenton, Chief Archaeologist, CLEY, Government of Nunavut

ARCHAEOLOGICAL RESOURCES: TERMS AND CONDITIONS BACKGROUND

- I. The archaeological record of the Inuit of Nunavut is a record of Inuit use and occupancy of lands and resources through time. The evidence associated with their use and occupancy represents a cultural, historical, and ethnographic heritage of Inuit society and, as such, Government recognizes that Inuit have a special relationship with such evidence which shall be expressed in terms of special rights and responsibilities.

The archaeological record of Nunavut is of spiritual, cultural, religious and educational importance to Inuit. Accordingly, the identification, protection and conservation of archaeological sites and specimens and the interpretation of the archaeological record is of primary importance to Inuit and their involvement is both desirable and necessary.

In recognition of the cultural, spiritual and religious importance of certain areas in Nunavut to Inuit, Inuit have special rights and interests in these areas as defined by Article 33 of Nunavut Land Claim Agreement.

- II. "Archaeological site" means a site or work within Nunavut of archaeological, ethnographical or historical importance, interest or significance or a place where an archaeological specimen is found, and includes explorers' cairns. "Archaeological specimen" means an object or specimen found in an archaeological site of archaeological, ethnological or historical importance, interest or significance and includes explorers' documents.
- III. Any new Terms and Conditions raising issues found in ss. 10 and 16 of the Territorial Land Use Regulations should duplicate statutory sections, or be stricter, but not more lenient in terms of protection of archaeological resources.
- IV.
 1. The permittee shall not operate any vehicle over a known or suspected archaeological site.
 2. The permittee shall not remove, disturb or displace any archaeological specimen or site.
 3. The permittee shall contact the Department of Culture, Language, Elders and Youth, Iqaluit (867-979-4720) and DIAND official should an archaeological site or specimen be encountered or disturbed by any land use activity.
 4. The permittee shall immediately cease any activity which disturbs an archaeological or historical site, encountered during the course of a land use operation, until permitted to proceed with the authorization of the Department of Culture, Language, Elders and Youth.
 5. The permittee shall follow the direction of the Department of Culture, Language, Elders and Youth and DIAND in restoring disturbed archaeological sites to an acceptable condition, and according to the respective jurisdictions and authorities.
 6. The permittee shall provide information to the Department of Culture, Language, Elders and Youth about each archaeological site or specimen encountered by any land use activity, by completing the attached form.
 7. The permittee shall make best efforts to ensure that all persons working under authority of the permit are aware of these conditions concerning archaeological sites and specimens.
 8. The permittee shall avoid the known archaeological sites in the area as listed in Attachment #1.

9. The permittee shall have an archaeologist perform the following functions, as required by the Department of Culture, Language, Elders and Youth, as the facts may demand: survey, inventory and documentation of the archaeological and historical resources of the land use area; assessment of potential for damage to archaeological sites; mitigation; marking boundaries of archaeological sites for avoidance; restoration. The Department of Culture, Language, Elders and Youth shall authorize by way of an Archaeologists Permits all procedures subsumed under the above operations.

ATTACHMENT #1

Hi Margaret,

1. Devon: 76:00:00 to 76:30:00 N and 93:00:00 to 96:00:00 W = 58 sites
Complete records are below. Remember records are duplicated where there are multiple years of field research. Sorry for the spacing problems. (Let me know if you want a better looking document - it would take a bit of time.)

2. Devon: 76.420167 N, 93.567117 W, 59B = 0 sites
(I searched on 76:42:00 N to 76:43:00 N and 93:00:00 W to 93:56:00 W & checked map sheet 59B - there are no sites registered that far inland.)

REMARKS A total of thirty five features were identified at the site in two clusters, of which sixteen appear to have been dwelling structures. Three of these consisted of light rock rings on the

surface, while the rest were semi-subterranean structures. Four of these consisted of a ring of tabular rocks placed vertically to form walls, while

another was similar but had a dividing line of rocks across its centre. Six consisted of a similar ring of rocks with a dividing

line of rocks, but one side of each structure was paved while the other side was a slightly raised

sand/gravel bench, presumably a sleeping platform. The remaining two structures were

heavily built sod and rock structures with a paved floor and sandy platform area. They also apparently had shallow entrance passages.

All of

these structures were excavated. The other features at the site included

seven hearths, two storage pits, eight other pits, and two other structures, possibly windbreaks or dismantled dwelling structures. Excavations carried out under the direction of Rochelle Allison.

REMARKS Site consists of ten semi-subterranean houses with walls of sod and rock. Five of the houses (numbers 1, 2, 5, 9, 10) contained considerable quantities of whalebone in their interiors, presumably

coming from the collapsed super structures of the houses, while the other five had been thoroughly stripped of their whalebone either upon abandonment or not too

long afterwards. In 1976 and 1977, McGhee excavated Houses 5 and 7, which proved to be roughly oval in outline with sleeping

platforms taking up the rear halves of the houses and cooking alcoves to the right of the entrance passages.

House 7 had its platform rebuilt twice and its floor rebuilt once.

In 1984, Houses 1,4 and

8 were excavated. In 1985 houses 2, 6, 9 and 10 were excavated, leaving

house 3 as the only house not excavated. In addition, there are

twelve

cache structures on the coastal side of the gravel beach ridge, approximately 20 metres from the rest of the site. (Park) The site

was

observed by T. Pollock, a geologist with BHP Minerals, Vancouver in 1994. He observed and photographed some houses and surface whalebone.

BORDEN RbJr-1

SITE NAME Porden Point Brook Village

PERMIT NUMBER NWT 76-389

LOCATION Site located on the inland slope of a gravel beach ridge, 7 m. ASL,

approx. 1200 m. W. of the tip of Porden Point and 300 m. from its N. Coast. The site straddles a curved section of a shallow mossy brook draining a lake in the centre of the point.

REMARKS Lower Beach Component - Largest Independence II component found on
 Grinnell Peninsula. Consists of 13 distinct features, 1 or 2 possible
 features and a couple of caches

which may relate to more recent occupations. Lower Embankment
 Component - Small Dorset camp associated with an Independence I component
 at higher elevation. Skull Component - Consists of group of six
 features found in 1972 and named from the find of
 a human cranium on surface near a box of slabs similar to
 Independence II hearth boxes. 5

mid-passage structures, one cache. Cold Component - 31 features
 scattered

along 200 m. of raised beaches. Ca 50 percent remains of dwelling
 structures. Ca 50 percent represent isolated hearths or outdoor

activity

areas. Upper Beaches Component - Second largest Independence I
 component at Port Refuge. Located on beaches to S. and W. of the
