Re: Camp location for Wet Coast Capital Corp.

Attention Lorna Porter

A/Licensing Administrator

File No: NWB 6WET

We have moved our camp location from the west side of the lake to a flat esker across the lake, the east side of the lake. The camp has been moved 300 yards east.

The reasons for moving the camp location are firstly safety, the first trip with Air Tindi into our camp area was on a stormy day and the pilot declared our chosen site dangerous, mostly because he could not see the depth of our lake.

The pilot then landed 5 kilometers south on the much larger All Night Lake.

On July 25 I walked from All Night Lake to the chosen lake and surveyed the appropriate site first hand.

I made the decision that we would use this safe site for our camp and commenced locating there.

We will follow all regulations at this site the same as if we were at the unsafe west site. I am also faxing from the field a fax copy of our changed location.

My Satellite phone # is 600 700 2560 Fax is 600 700 9445 I will also call you.

Yours Truly

Gerry Diakour
