Subject: Notification of Application on Hold; Licence No. 1BC-FRK----

Dear Mr. Watson;

The Nunavut Water Board (NWB) thanks Defence Construction Canada (DCC) for its submission on June 12 containing an operational site map, conceptual site plan and a response to the deficiencies letter sent to DCC on June 10, 2009. From DCC's response, the submission of several important items is dependent on hiring a contractor who will prepare them.

As the project is not scheduled to start until summer 2010 and given the uncertain time period required to procure the required information, the NWB recommends that DCC submit a request to withdraw the application, and re-submit about four months prior to the proposed activity. This would allow ample time for DCC to ensure it has all the required information and to allow the Board time to properly review the project prior to the anticipated start date.

Should DCC continue with the active application the NWB requests a timeline that would clarify when we could expect the remaining information. The application would then be placed on hold until receipt of the following information:

1. A Spill Contingency Plan specific to the project;
2. 90% complete (for construction) drawings, stamped and signed by an engineer, for all Water Use and Waste Disposal Facilities planned for the construction phase.

Should you have any further questions, please feel free to contact the undersigned at (867) 360-6338, at your earliest convenience.

Sincerely,

Original Signed By:

Don Carr
Technical Advisor, NWB
