DATE: SEPTEMBER 2, 2004

TO: NUNAVUT WATER BOARD

CC

FROM: CITY OF IQALUIT

RE: NORTH 40 ISSUES

- 1 There are currently three operations extracting water in the North 40. Water for these operations is being extracted from Carney Creek or standing water in the gravel pit. These operations include:
 - A concrete plant operated by Kudlik Construction.
 - A concrete plant operated by Baffin Building Systems.
 - An asphalt plant operated by Baffin Building Systems.

- 2 The Inspectors Direction for an Abandonment and Restoration Plan for the waste metals dump at the North 40 requires this document to be submitted to the Nunavut Water Board prior to January 1, 2005.
