**RE: NWB Licence No. 8BC-AAS----**

Dear Ken Simonite:

On May 18, 2010, the Nunavut Water Board received an application from the Department of National Defence for a licence to allow it to use water and deposit waste during the construction of four concrete pads for Mobile Aircraft Arrestor Systems (MAAS) at the Canadian Forces Forward Operating Locations (FOLs) at the Rankin Inlet and Iqaluit Airports.

The application was reviewed by technical staff at the NWB and it was determined that since municipal water sources and waste disposal facilities will be used during the construction phase of the project, as indicated by the applicant, a licence from the NWB was not required. However, if the sources of water or the method by which waste will be disposed of were to change, the proponent is required to inform the NWB so that the application could be reevaluated.

Should you have any questions or concerns please do contact me at your earliest convenience.

Regards,
