Good morning Cynthia,

As requested, the following are the scope changes that are taking place for the above noted project:

1) Mobilization/Demobilization: The winter road as outlined in our application will no longer be used. Instead, we will be using heavy lift aircraft to get equipment and supplies to and from site. We anticipate that mobilization will take place in May/June of 2017.

2) Non-Hazardous Landfill: This piece of infrastructure as well as the activities associated with it (demolition of camp, etc.) will no longer be taking place as part of this stage of the project.

3) C-1 Diversion: As per discussions with you yesterday, we have no choice but to remove the C-1 diversion from our overall scope of work as we need to have a water licence in place in time for work in May/June 2017. With this being said, we must stress that this is not our preferred option. It's important that the Water Board understand that re-establishing the natural drainage flow in this area is very important for improving the water quality/chemistry in the pit, and by default the overall aquatic environment of the Carat Lake area.

Please proceed immediately with the processing of our application for a Type B water licence. Please let us know if you have any further questions or concerns.

Thanking you in advance,

Michael
