Thanks, Phyllis

Please note that the fuel caches have also been removed including the one that was of concern to one of the NWB's responders near the Kazan River.

Thanks,
Teresa

Good morning Teresa. This information will constitute an amendment to your current license which authorizes the exploration for uranium as well as the camp. The current license does not expire until August 31, 2009. I would suggest that if for the full term of the license there is to be no camp and no exploration for uranium you submit a cover letter indicating these changes and provide the 3 page application indicating same. This will also require another \$30.00 administration fee.

Regards,

Phyllis Beaulieu

Good afternoon Phyllis,

Please note that the above Water Licence amendment will no longer include exploration activities for uranium. All drilling and sampling will be for diamond exploration.

The camp located at 64 06' 40"N and 97 52'30" will not be utilized by De Beers Canada Inc.

Could you please make the above changes to the Amendment Application?

Please let me know if you require any additional information.

Thanks,
Teresa

I spoke with our A/Executive Director and she indicated that your application for amendment was okay as submitted as the application does indicate an expiry date of 2009. I have sent the file for review just so we don't hold it up any longer. We still require the following:

Signed application form

Admin fee of \$30.00 (water use fee is paid up right now)

Lats and Longs of drilling locations

Letter of authorization from the Hamlet of Baker Lake to dispose of waste at their solid waste site.

If there is a name to the lake that will supply the camp, that would be appreciated. Would it be Princess Mary Lake?

If exploration includes uranium, we will require a Uranium Exploration Plan.
