Hi Mr. Charlton, and Ms. Beaulieu,

The Department of Environment (DOE), GN thanks Mr. Charlton for your inquiry regarding our comments.

DOE understands majority of our concerns can be incorporated in the Water License, except for wildlife issues. DOE therefore would like to recommend that a wildlife management plan be developed to incorporate our wildlife recommendations and to ensure the project is operated in a manner that prevents, avoids and/or minimizes wildlife impacts to the least extent possible. If any assistance is required for development of the plan, please do not hesitate to contact us.

Regards,

Helen Yeh

Good afternoon, Mr. Charlton. There is no need to amend your approved LUP. These comments are referenced to every applicant for any action required and responses can go direct to the concerned parties and cc'd to our office. Examples in your case would be  
1. A revision to your spill plan as per the letter from GN-DOE and EC (this will be covered in the terms and conditions of your license as well) 2. Information on incinerator the proponent will be using as per the letter from EC (for their information) 3. Information per INAC's letter regarding your permits and expiry dates.

None of these items will hold up the issue of the license. It is currently with the Board for their approval.  
Regards,

---

Mme Beaulieu, Helen Yeh, Stephen Bathory, Cindy Parker,

We have reviewed the documents referred to and posted on the ftp site.

We

would like to comply with the requests as elaborated by the Nunavut Dept of Environment (Helen Yeh), Environment Canada (Cindy Parker), and the INAC Nunavut Regional office (Stephen Bathory). However, given that we have received a Land Use Permit from INAC Land Administration (LUP #N2007J0010, Jeff Holwell, April 17, 2007), we are unsure how to proceed with fulfilling these requests. Do we amend our approved LUP application and send to the concerned parties?

John D. Charlton, P. Geo
