RE: Field Inspection LUP N2008C0010. Nowleye Lake "BUGS".

On, July 25th, 2009 I conducted a field inspection at the above mentioned location.

A copy of the Inspection report is attached. After reading the report please sign and return a signed photocopy to my office. If you have any comments or suggestions please feel free to attach them to the copy of this report.

I apologize for the delay in forwarding this report to you.

Issues Identified during the inspection:

Campsite: Disassembled. Core Boxes remaining. Scaring of soil from camp tents/platforms. Ash remains from incinerator evident.

Fuel Storage: No fuel caches remaining.

Water: Nothing to see.

Waste: Site is pretty well clean.

Drilling activities: One drill site located. Soil plugged hole.

Comments: This was a fairly clean site while it was in use and now that it's been dismantled, it is again, fairly clean. If this site is to be reopened then the permit holder must notify the Inspector at least 48 hrs in advance of re-opening.

Canada

Please do not hesitate to contact me should you have any questions or comments.

Sincerely,

A handwritten signature in black ink, appearing to read "K. Robertson".
