Re: Response to Notification of Deficiencies – New Application 2BE-CGR

Dear Mr. Dwyer,

Further to your correspondence of June 16, 2010 following please find the information that you have requested in order for the processing of the above referenced water use application to resume:

- **\$30.00 administration fee and \$30.00 water use fee** – both fees were paid over the phone via credit card during a conversation with Phyllis Beaulieu on June 8, 2010.
- **NIRB Screening Decision** – an email dated June 17, 2010 from NIRB stating that this project is exempt from screening under Section 12-1(2) of the NLCA appears as an attachment to this correspondence.
- **NPC Conformity Decision** – further to our communication of earlier today an email has been sent to Brian Aglukark of The Nunavut Planning Commission officially requesting that an NPC conformity determination be performed for the project associated with this application. A copy has been attached for your reference.
- **Clarification as to whether the camp location is on Crown or Inuit Owned Land** – the 5.7 km stretch of shoreline that has been identified as the area from which a camp location will be chosen is on Crown Land. While the proponent does have landholdings in the vicinity that are located on Inuit Owned Land parcels there is no plan at the present time to access them from the fly camp associated with this application. Should this situation change the requisite land use approvals will be sought from the appropriate Regional Inuit Association before accessing any Inuit Owned Land.

If you have any questions regarding this submission or require any further information regarding this application please contact the undersigned at your convenience.

Yours truly,
STORNOWAY DIAMOND CORPORATION
Per:

Nicole Westcott
Land Administrator
