**Cc:** 'Richard Dwyer'  
**Subject:** New Water Application - 2BE-CGR - Request for NPC Conformity Determination

Good Afternoon Mr. Aglukark,

Stornoway Diamond Corporation has recently submitted an application for a new Type B water license for a two to four person fly camp that is to be occupied for a period of no longer than 14 days in the Coronation Gulf region of Nunavut.

As I understand it Richard Dwyer of the Nunavut Water Board has forwarded a copy of the application package to you however it is the proponent's responsibility to request that you review the project for NPC conformity. Please accept this email as an official request for an NPC Conformity determination for the project associated with 2BE-CGR.

In addition I believe that you were copied on a letter sent to my attention from Mr. Dwyer regarding deficiencies in the original application package and I wanted to advise you that I am currently composing a reply to this correspondence and will be sure to include you on the distribution list when it is sent via email this afternoon.

If you have any questions or require any further information regarding the proposed land use operation please do not hesitate to contact me at your earliest convenience.

Best regards,

Nicole Westcott  
Land Administrator
