Good Day Chris,

The steps moving forward will be to contact the Nunavut Water Board, Licensing Department and AANDC Land Administration to confirm that all the information provided was adequate regarding a Cancellation application and Final Plan.

According to Section 33 of the *Territorial Land Use Regulations*, we require a final plan which shows:

1. The lands actually used for the land use operation, that is, a map or maps drawn to scale which clearly outline the area used by you, the Permittee, in such a manner that we can distinguish between areas used by you and those areas not used by you.

The procedure normally used is to present two maps of different scales, one being 1:250,000 and the other being on a scale which clearly depicts the operation as it was conducted on the surface, distinguishing the use area vs. the non-use area.

**ALL MAPS MUST HAVE THE NORTH INDICATOR, SCALE AND CO-ORDINATES CLEARLY MARKED.**

2. A submission indicating the hectares utilized in each segment of the land use operation, ie: campsites, drill sites, seismic lines, access routes, etc.
3. A submission outlining the calculation of fees for ease of reference.

Please contact me if you require further assistance in this process. If you have a question regarding the discussed documents please contact the appropriate department representatives cc'd on this email.

Regards,

**Christine Wilson**

Good day to all,

Now that the field operator with Aboriginal Affairs and Northern Development Canada has approved site clean-up and declared that the permits can be considered for cancellation, what is the next step in cancelling Water License 2BE-SIP1114 and Land Use Permit N2011C0023

Thank you,

Chris Hicks
