H. Comments

Please include any information that was not captured above.

Please note that the NWB annual report, and an application for the renewal of the current NWB permit have not been submitted to NWB because during the conduct previous and current iterations of the AOA (formerly WWA course), water is not drawn from the host community water bodies. Also, as stated in the AOA course descriptions attached, waste water generated during the conduct of the AOA activities is frozen, and transported for disposal in Trenton, and not in host communities, after the conduct of the AOA training.
