## **Section 11.0 Contractors & Other Personnel**

Ashton is anticipating that drill operations will involve up to four people on site at any time. Personnel will consist of: 1 geologist, 1 driller, 1 driller's helper and a technician.

The staffing of exploration programs is dependant upon the results of our geological evaluation work and the annual budget allocated for Nunavut. As a result it is relatively difficult to determine precisely who will be working on the project a year from now.

Two tables have been provided below. The first table outlines the principle field staff for Nunavut while the second table outlines the contracting companies that are regularly used. Ashton Mining (Northwest Territories) Ltd. will be managing all field operations and, as a result, their personnel are listed in Table 1.

Table 1
Summary of Ashton Field Personnel

Name	Position	Name	Position
Jeff Ward	Project Manager	Andy Berry	Project Manager
Dave Pickston	Geological technician	Jim Rooke	Geological technician
Scott Jardine	Geological technician		

Table 2
Summary of Ashton Contractors
