Hi Matthew.

I am quite curious what you meant in your message when speaking about 2 Type A applications

The only thing that i could think with respect to the second Type A application may be the the winter road construction? However, it wasn't looked as a pre-development activity?

Or it is not for the road construction?

Submitting 2 Type A applications together should be considered carefully as there are some uncertainty: May it considered as a project splitting or not? Or how they would be processed by the Board, separately or under the same Public Hearing process etc.

Those are questions that need to be clarified and discussed before the submission.

Regards,
Karen

Amanda/Dave,

Please find attached a letter detailing out the timelines of the Back River Project Draft EIS Submission. As we are in a NIRB/NWB coordinated process this package will also contain various regulatory applications including two Draft Type A Water Licenses.

If you have any questions please feel free to contact me.

Happy holidays, Matthew
