Re: Anticipated Timing of Final Environmental Impact Statement (Final EIS) Submission – Back River Project

Dear Tara,

In response to the Nunavut Impact Review Board (NIRB) letter dated September 28, 2015, Sabina Gold and Silver Corp. (Sabina) is pleased to provide an update on the anticipated timelines for submission of the Final EIS for the Back River Project.

Since receipt of the Pre-Hearing Conference Report in December, 2014 Sabina has continued to actively engage communities and regulators on their areas of concern with respect to the Draft Environmental Impact Statement. Since December, Sabina has completed an additional 28 engagement sessions with Kitikmeot Region residents as well as an additional 2 sessions in the Northwest Territories. In addition, Sabina has completed an additional 22 sessions with Federal and Territorial governments including 19 with the Federal government, 2 with the Government of Nunavut, and 1 with the Government of Northwest Territories.

Sabina remains committed to ongoing discussions with the communities and regulators as we move towards the Final EIS Hearings.

Sabina is pleased to advise the NIRB that we intend to submit the required digital and hard copies of the Final EIS during the week of November 23, 2015. Due to unknown factors related to shipping, Sabina will provide the NIRB Technical Advisor additional information on the exact delivery date once the document has shipped.

If any further clarifications are needed, please do not hesitate to contact me.

Yours truly,

Matthew Pickard
Vice President, Environment and Sustainability
