Hello Richard,

With reference to the Nunavut Water Board December 17, 2020 initiation of the Technical Review process for Water Licence 2AM-BRP1831, the letter stated the following;

" However, both KIA and CIRNA indicated that "*Sabina is required to provide an updated Hydrodynamic model*", as well as the information on the groundwater inflow parameters, for technical review of the file".

CIRNAC would like to clarify when this updated information will be provided for technical review. As we are currently in the technical review phase, CIRNAC recommends that Sabina provides the model as soon as possible for review. Please let me know if you have any questions on our request.

Thanks and best regards,

Godwin Okonkwo (M.Sc., P.Bio)
