Hi Richard,

Sabina is requesting to submit responses to the Parties' review comments regarding the Hydrodynamic model on March 12th as opposed to March 8th. The March 12th timeline will provide Sabina with more ample time to discuss responses with regulators in advance of providing our Technical Comments. We have a meeting schedule with ECCC tomorrow March 4th, and are tentatively establishing a meeting with CIRNAC on March 9th. Sabina also clarifies we are not requesting any changes to the "next steps" outlined in your February 12th email including the March 23-24 Technical Meeting / Pre-Hearing Conference.

Thanks,
Merle
