-----------	--	---	--

Background:

Sabina Gold & Silver Corp. is authorized to use 675 cubic meters per kilometer per year for the Interconnecting Winter Ice Road (IWIR). The IWIR is 160 kilometers from the Marine Laydown Area (MLA) connecting to the Goose Bay Property. Although majority of the IWIR is on Inuit Owned Lands (Kitikmeot Inuit Association) it still has authority to use water as per the water licence 2AM-BRP1831.

Inspector Notes:

On May 9, 2019 a water licence inspection was conducted at the Sabina Interconnecting Winter Ice Road (2AM-BRP1835) (see photo log #1) by Inspector Candice Pedersen accompanied by Merle Keefe, Michael Marchildron, and KIA inspectors Geoff Clark and Jonathan Rousch.

During this inspection on May 9, 2019 the following was noted:

At roughly kilometre 42.5 starting from the MLA a small spill was noted (see photo log #2 and #3). It appeared to be a green glycol spill on the side of the IWIR on a rest stop on Crown Land, however, the spill was cleaned on the spot, the contaminated snow was placed into a garbage bag and placed into the back of the truck for proper disposal at the Goose Property.

At kilometre 130, a fuel transfer cube that was approximately 1/16th full was observed on a small lake next to the IWIR (see photo log #4). Inspector was informed that it has been sitting overnight, and it would be picked up and moved to camp later that day. The Inspector was informed that this fuel trans cube was used to fuel up equipment as demobilization of the forward camp was being conducted.

Shortly after seeing the fuel transfer cube a spill was noted on the small lake (see photo log #5), a piece of equipment had a hydraulic spill and the majority of it was scooped into a portable yellow berm; however, some remnants of hydraulic fuel was still present on the ice, Inspector was informed it will be cleaned. The spill was reported to the spill line (19-284). A follow up call confirmed this was cleaned up later that day. This spill is considered closed.

No other concerns where noted during the inspection.

SECTION 2	☐ Comments	☐ Non-Compliance with Act or Licence	☒ Action Required
-----------	-----------------------------------	---	---

Inspector reminds Sabina to not store fuel on ice unless it is for immediate use.
