Hello Richard,

In accordance with Sabina's Type A Water Licence (No. 2AM-BRP1831), Part E, Item 15(a), Sabina is submitting the attached Back River Project Aquatic Baseline Synthesis Report to the Nunavut Water Board. The attached report includes updated 2017-2018 baseline data collection that takes into account seasonal variation. We look forward to addressing any comments the parties may have with respect to this report.

Of note: Sabina recently updated the Water and Load Balance Model to be included as part of the upcoming Type A Water Licence amendment application process and is now currently updating the hydrodynamic model (Part E, Item 15(b)). Sabina will provide the updated hydrodynamic model for the NWB's consideration in the next annual report or as part of the amendment application.

Thanks,

Merle Keefe, EIT
