Wow! Well, that's good to hear. I wonder what took so long for it to finally make its way to your office. Just so you know, we shipped a package last week and so you should be receiving (either at the airport or at your office, I'm not sure what the delivery policy for Canadian North is) an additional package this week. It is an updated version of Appendix 23 of the Amendment 4 document you received last Friday.

Also, we've noticed that the cover page of the package you just received has the wrong amendment number on the cover page (it says amendment 3 instead of amendment 4). We're just updating that today and we'll e-mail it to you to swap with the current cover.

If you have any questions about any of this, let me know.

Thanks,

Lea-Marie

The package finally showed up in our office on December 8th

Hi Phyllis,

I've called Canadian North and they told me the package arrived in Gjoa Haven Nov. 15 on flight 478. Unfortunately, they can't say what happened after that. So I've also called the Co-Op because apparently they handle cargo delivery and I spoke with Daniel. He's going to talk to the Canadian North guys in a couple of hours and he said and he'd call me back to let me know what they can find. The waybill number is 518-67935464. If they can't find anything today, we'll resend the package.

I'll keep you posted.

Lea-Marie

Good morning Christine and Lea-Marie – please be advised that the package has still not arrived in Gjoa Haven.

Our clerk has checked several times and they insist there is no package at the airport to be picked up. Is there some way you can check from your end to see where it is? Karlette, I understand, received her package and so did NIRB. Our copy is lost in transit somewhere.

Regards,

Ryan, Li, Dionne, and Phyllis,

Chris Hanks asked me to give you an update on the status of HBML's Doris North Mine Changes and Related Amendments Application.

The package is nearly complete and is currently under review by KIA and its suite of consultants (KIA has asked HBML to undertake this preliminary step before formal submission to regulatory authorities). Once KIA have completed their preliminary review, HBML plans to formally submit to NIRB and NWB the detailed description of the changes, supporting technical memos which consider these changes (including detailed environmental reports from Rescan, geochemical analysis and engineering briefs from SRK and other engineering consultants, and an updated project water balance), as well as a summary of the changes to the Project Certificate and Type A Water Licence that HBML has identified as necessary to proceed with the proposed Mine changes.

Provided KIA review completes in the agreed time period, HBML anticipates submission to NIRB and NWB in the first week of November. HBML would like to proceed with some of the changes contemplated in the application as early as Q1 2013.

To that end HBML would like to schedule a meeting with NIRB and NWB once you have had opportunity to review the application package to identify any additional information requirements and also to get a sense of the anticipated regulatory schedule for processing the amendments. HBML proposes to have this meeting at the end of November and would be pleased to travel to both Cambridge Bay and Gjoa Haven if it would assist.

Many thanks,
Christine Kowbel
