Everyone document we receive pertaining to security is in the folder as indicated. I suggest that any additional information will need to be provided by AANDC

Subject: Security Reclamation for Doris North Project

Hello Phyllis, I have gone through the Doris North file on your site looking at the correspondence for the security. INAC had estimated that water related reclamation cost to \$6.2 million, both KIA and Miramar estimated the cost for total reclamation to be about \$12 million. The NWB requested that \$11.7 million be provided for security for the project. KIA has a corporate guarantee for \$8 million leaving \$3.7 million to AANDC as security.

INAC (AANDC) had submitted a report on their cost estimates based on the RECLAIM model done by Brodie Consulting Ltd in July 2007 titled Doris North Project Reclamation Cost Estimate. I am unable to find this report on your web site. I have found an updated report by SRK Consulting with a detailed cost breakdown and a comparison to the Brodie report. Do you know where the Brodie report is? I have asked AANDC to provide this me and they will resend it to the NWB and myself. Please advise.

Thank You

John
