

REVISED Term and Condition No.		14	NWB's comment
Category:	General		
Responsible Parties:	The Proponent and the Nunavut Water Board		
Project Phase:	Pre-construction		
Objective:	Collect additional information due to uncertainty in water management The Proponent shall collect additional precipitation evaporation and runoff data and incorporate it into a revised water balance to be submitted to the Nunavut Water Board (NWB) as part of the water licence application.	Fullfilled	
Term or Condition:	No reporting requirement		
Reporting Requirements:			

REVISED Term and Condition No.		15	NWB's comment
Category:	General		
Responsible Parties:	The Proponent and the Nunavut Water Board		
Project Phase:	Pre-construction, construction, closure, post closure		
Objective:	To monitor the environmental impacts of the effluent in the Tailings Impoundment Area and Doris Creek and compare these effects to the impact predictions in the 2005 FEIS and the 2015 Amendment Application. The Proponent shall not be permitted the water discharged into Doris Creek to exceed the criteria set by the NWB.	Acknowledged. Conditions under Part G Items 28 , 29 & 30 will be carried forward and included in the amended licence for the stages of pre-construction, construction, closure and post closure	
Term or Condition:	To be included in the Proponent's annual reporting to the NIRB		
Reporting Requirements:			

REVISED Term and Condition No.		16	NWB's comment

Category:	General	
Responsible Parties:	The Proponent, Nunavut Water Board, Nunavut Impact Review Board, and Environment and Climate Change Canada	
Project Phase:	All Phases	
Objective:	To monitor the environmental impacts of the effluent in the Tailings Impoundment Area and Doris Creek and compare these effects to the impact predictions in the 2005 FEIS and the 2015 Amendment Application. The Proponent shall take all reasonable steps to prevent any discharge that is not in compliance with applicable regulatory approvals or requirements. If such a situation is encountered, the Proponent shall take immediate action to address the noncompliant discharge.	Condition I,5 "If, during the period of this Licence an unauthorized discharge of waste and or Effluent occurs, or if such discharge is foreseeable, the Licensee shall: a) Employ the Spill Contingency Plan b) Report the incident to the Spill Reporting Line c) submit a report to the Inspector"
Term or Condition:		
Reporting Requirements:	To be reported on an as needed basis and included in the Proponent's annual reporting to the NIRB.	Acknowledged condition I,5 will be carried forward and included in the amended licence

REVISED Term and Condition No.		18	NWB's comment
Category:	General		
Responsible Parties:	The Proponent, Nunavut Water Board, Nunavut Impact Review Board, Kitikmeot Inuit Association, and Natural Resources Canada		
Project Phase:	All Phases		
Objective:	To assess and mitigate impacts of acid rock generation and metal leaching The Proponent shall submit to the NWB as part of the water licence application, a program detailing the methodology for testing quarried rock for acid generation and metal leaching potential. The sampling, testing and analysis must be done by a professional geologist registered in Nunavut.		Acknowledged a condition will be included in the amended water licence
Term or Condition:			

Reporting Requirements:	To be reported to the NIRB as required	
-------------------------	--	--

REVISED Term and Condition No.		31	NWB's comment
Category:	Closure and Reclamation		
Responsible Parties:	The Proponent and the NWB		
Project Phase:	Operations, Care and Maintenance		
Objective:	To ensure a plan was in place due to the short lifespan of the Project		
Term or Condition:	The Proponent shall maintain a complete Closure and Reclamation Plan on file with the NWB prepared in accordance with requirements of the NWB and other regulators		Acknowledged. Conditions referring to C&R Plan submission and update will be carried forward and included in the amended licence
Reporting Requirements:	The NIRB would require this prior to the closure as the mine is subject to NIRB Review.		

NEW Term and Condition No.		36	NWB's comment
Category:	Freshwater		
Responsible Parties:	The Proponent the NWB and the KIA		
Project Phase:	Pre-construction, construction, and operations		
Objective:	To assess the environmental impact of the Project on Doris Lake and fish and fish habitat		
Term or Condition:	Lake and fish and fish habitat recording of Doris Lake water levels during construction and operations. This will allow for detection of actual Doris Lake draw down below the sill level; computation of the amount of drawdown, quantification of the project impact, and implementation of adaptive mitigation and management measures as appropriate.		There is an on-going Doris Lake water level monitoring at TL-1; this monitoring station will be retained under the amended WL
Reporting Requirements:	To be included in the Proponent's annual reporting to the NIRB.
