NOTE TO FILE

May 10, 2002

This is one of those large projects where numerous agencies are involved so the procedures are slightly different.

For any mail coming in for this project, send Philippe a copy by fax or e-mail right away.

So far, the following has taken place:

- we received the application
- we sent it to NIRB for screening but indicated that the proponent had asked for a review.
- NIRB sent a letter to the distribution list giving a deadline of April 23 asking for other parties' opinions. DSD asked NIRB for an extension till April 30, 2002.
- We haven't heard anything since.

Check with Philippe before doing anything, but you may want to check with him (give him the above break-down) if we should check with NIRB next week about when we can expect any correspondence. He may just suggest waiting.

The distribution list has been notified that this project is on the ftp site. However, because of NIRB's decision – no deadline has been set.

There is a possibility that if NIRB does a review that NWB-NIRB will have a joint process. In that case, check our public hearing (Attachment 2 of the front checklist in the blue folder) list to see what needs to be done.

This is a project where you'll have to check with Philippe every step of the way.
