Robin,

As you know both the NWB and NIRB have requested that parties review the information submitted by TMAC in support of the Doris North Project. Unfortunately EC's water quality experts are unavailable to review the Doris North amendment application in time to meet the NWB deadline of September 11. Given that the NIRB recently extended their deadline to September 18 and that EC proposes to make a single submission to satisfy both the NWB and NIRB processes EC requests that the NWB extend their commenting deadline to September 18 to permit a complete review of the information by EC and to align with the NIRB commenting deadline.

Please contact me if you require more information.
