Re: Hope Bay Project – Supplementary Submission of Madrid North WRP Sump 1, 2 and 3 As-Builts - Doris and Madrid 2019 Construction Summary Report

Dear Mr. Donald,

On April 2, 2020, TMAC Resources Inc (TMAC) provided the Nunavut Water Board (NWB) Construction Summary Reports for infrastructure developed at Doris and Madrid under Type 'A' Water Licence 2AM-DOH1335. Included was the 'Hope Bay Project: Doris and Madrid 2019 Construction Summary Report' (SRK, dated April 1, 2020). This Construction Summary Report includes development of the Madrid North Waste Rock Pile (WRP). At time of submission, it was noted that Madrid North WRP sumps were 'to be constructed'.

TMAC recently completed the construction of Sumps 1, 2 and 3 of the Madrid WRP and as such is providing the NWB a supplemental submission to the Hope Bay Project: Doris and Madrid 2019 Construction Summary Report showing final as-built design. Please see Attachment 1 to this letter for Madrid WRP Sumps 1, 2 and 3 as-builts.

These sump as-builts are intended to be added to the existing Madrid WRP as-built package dated April 1, 2020. There have not been any significant changes other than completion of the sumps, so a reissuance of the entire package was not deemed required.

Should you have any questions please feel free to contact me at oliver.curran@tmacresources.com.

Sincerely,

Oliver Curran

Vice-President, Environmental Affairs

TMAC Resources Inc.
