Hello all,

We are in the process of designing the Primary Vent Raise Pad, the one just off north of the Secondary Road. The original space requirements were quite modest in comparison to what the updated requirements are (729 m² compared to 8,773 m²). At that time we did indeed receive an OG survey of the area in question, for which we thank you kindly, and we would like to ask for the survey of the additional area required. I attached a dxf outline of the preliminary design footprint, for your reference. As in the past, we would be grateful if the survey would include a buffer zone around the design footprint, say 10 m.

Iozsef Miskolczi
