

Please do not hold up the completion of the vent raise civil t/o package for the highwall. If highwall work is required it can be covered on a separate package.

Subject: RE: Vent Raise Highwall

Hi Brad,

This question was raised in SRK's Daily Report #274 [2011-10-12]

I did touch base with Anton. Either Anton or Bruce will be back for a site visit in November. At that time they will be able to complete a site investigation with remediation design and recommendations for implementation.

I hope Kerry passed this information along to everyone at site.

Sincerely,
Lowell

Subject: Vent Raise Highwall

Importance: High

Good Morning, per my previous e-mail dated October 9th, Nuna is enquiring as to the status of the Vent Raise Pad Highwall. Is there a report available to define the status regarding any forthcoming work required to possibly stabilize the wall? Or has the wall been determined to be sound and no further mediation is required?

Please advise.

Regards Brad
