---

Hey Mike

We have taken a look though the survey data that Nuna has supplied and it looks like the deficiency (from 2010) on the Doris North Access Road, above Pad R/ DNTF, has now been addressed. Attached to this email please find a pdf of the compiled as-built figures that Georges previously sent to us. Not that in these as-built figures the fix to the North Access Road is shown to have been adequately completed.

Let me know if you have any additional questions, concerns or if you require any additional information.

Hope all is well.

Kind Regards,

John K

Megan / John,

Just following up on the outstanding deficiency for the Doris North Access Road and was wondering if SRK has had a chance to review the data that was supplied.

We are trying to close off the remaining punch list items as they are corrected on site.

Thanks,

Mike Price

Hello,

Please see attachments for cut/fill map and survey data after placement of crush.

Regards,

Georges
