Hi Ida

Could you also save the email below to this folder:

V:\Licensing\PR MAIN\2 MINING MILLING\2A\2AM - Mining\2AM-DOH1323 TMAC\3 TECH\F WASTE DISPI\F12 & 15
Waste Rock Ore&Mine Backfill Mgmt Plan

It is my PTR request for additional information.

Thanks,
Derek

Hi Oliver

I think the submission is fairly strait forward. Appendix A does A nice job of summarizing the procedure. I do have one comment though, could you include the criteria for determining if waste rock is PAG, metal leaching, or contains residues from drilling and blasting. Specifically I am looking for a limit for sulphur (ABA test), and shake flask extraction test for blast residues (ammonia, nitrate, nitrite), metal levels, and drilling brine (chloride). The previous version and the Quarry

Thanks,
Derek
