Re: Revised Hazardous Waste Management Plan for Water Licence 2AM-DOH1323

Hello,

Please find enclosed a revised Hazardous Waste Management Plan (Plan) for the Hope Bay Project. This Plan is required under Water Licence 2AM-DOH1323 Part G, Item 10. This Plan replaces the previously approved Plan submitted dated March 2012 and fulfills the commitment to submit a revised Plan 3 months prior to Operations.

Although a hazardous waste management plan is not required under Water Licences 2BE-HOP1222 and 2BB-BOS1217, similar to the 2012 plan, management procedures for hazardous wastes generated under those licences are included in this Plan for standardization of practices across Hope Bay Belt projects.

This Plan has been revised to reflect Operations phase conditions of the amended Doris Project, as well as that of other project phases. This plan has also been converted to a modularized format for consistency with other TMAC plans and to facilitate future licence-specific changes should they be needed.

Should you have any questions or concerns regarding this submission, please do not hesitate to contact me at Katsky.venter@tmacresources.com

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'K Venter', with a long horizontal stroke extending to the right.
